

P/N CW-2000 & CW-3000

Air Cleanse Cleaning Wand

Domaille Engineering's innovative hand held cleaning wand has an integrated pressurized fluid and filter system for a debris free cleaning operation. Use the wand to clean polishing media from any surface including the polishing fixture, film or machine.

Benefits at a Glance:

- Can accurately spray air, fluid or a pressurized mist
- Special 2 μ m filtering system eliminates process variables associated with contaminated cleaning fluids
- Designed for integration into Domaille polishing machine
- Will remove polishing media from most surfaces
- Can be used to lubricate polishing film between process steps
- Lightweight, hand held device for ease of use

Manufactured to Domaille Engineering's exacting high quality standards.
