

FOJST - UPDATED

Fiber Optic Jacket Slitting Tool - MB15-7000

Featuring an updated design to accommodate 3 sizes of fiber in one tray, Ripley's Miller Series FOJST is a compact, one-step fiber jacket or tube splitter for jacketed or loose tube fiber optic cables.

Pocket-sized precision for technicians without time to waste.

Our MB15-7000 FOJST combines the best of both previous cassette trays into a single tool to accommodate a wider range of fiber slitting in one tool.

Developed for mid-span or end prep, the FOJST will produce two longitudinal slits 180 degrees apart. Ripley quality provides reliable, damage-free slitting to improve fiber reliability, simplify cable preparation and reduce time on site.

Features

- Three channel openings for 2.0, 2.5 and 3.0mm diameter fiber jacket or buffer tube
- Tight design tolerances avoid damage to the fiber optic cable
- Locator studs in the cassettes ensure repeatability
- Safe, compact & ergonomic tool design fits comfortably in the hand for easy operation without risk of injury
- Size: 2.875" x .875" x 2.125" (73.03 x 22.23 x 53.98 mm)

Align the fiber jacket or buffer tube to the proper channel

Close firmly and pull the tool along the cable

Release the tool and separate the cable elements
